6-Step Journey to Sustainability

BestPLUS recycled plastic lumber is created with a focus on sustainability, safety, and reliability every step of the way.

1

Plastic waste is screened for recyclability.

2

Recyclable plastic waste is prepared for processing.

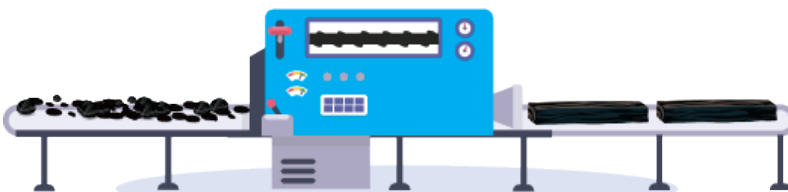

3

Waste is physically separated to remove incompatible compounds, such as metals or glass.

4

Materials are compounded, plasticized, and blended.

5

Blended mixture is extruded into molds to create the final lumber product.

6

Finished plastic lumber is cooled, cut, and undergoes a quality audit.

Landscape Timbers, Edging, & Turf Nailer Boards

Image	Nominal Size*	Actual Size	Weight (LB/FT)
	1" x 4"	$\frac{3}{4}" \times 3\frac{1}{2}"$	0.83
	1" x 6"	$\frac{3}{4}" \times 5\frac{1}{2}"$	1.20
	2" x 4"	$1\frac{1}{2}" \times 3\frac{1}{2}"$	1.93
	2" x 6"	$1\frac{1}{2}" \times 5\frac{1}{2}"$	2.65

	2" x 10"	$1\frac{1}{2}" \times 9\frac{1}{2}"$	5.20
	3" x 4" LT	$3" \times 4\frac{1}{8}"$	4.00
	4" x 4"	$3\frac{1}{2}" \times 3\frac{1}{2}"$	4.63
	6" x 6"	$5\frac{1}{2}" \times 5\frac{1}{2}"$	9.25
	6" x 8"	$5\frac{1}{2}" \times 7\frac{1}{2}"$	12.30
	1" x 2"	$\frac{3}{4}" \times 2"$	0.47

*Standard length is 8 ft. Stakes are available in 12" or 18". For custom lengths, call 1-844-200-2378.

CONTACT US

BestPLUS is a privately owned subsidiary of Triumvirate Environmental, an environmental services company based in Somerville, MA, with operations across the United States. Our organizations collaborate to provide innovative and sustainable solutions to healthcare, life sciences, higher education, manufacturing, landscaping, synthetic turf, truck & trailer, and construction markets, among others. We are always looking for new plastic-based materials to recycle and new plastic lumber products to manufacture.
